01

Supporting Australian mining operations through equipment rental, maintenance and contract mining services.

OUR COMPANY

SMS Mining Services provide quality equipment that ensures peak performance, backed by reliable servicing and maintenance for uninterrupted mining operations.

OUR DIFFERENCE

At SMS, we pride ourselves on being a highly adaptable partner in the mining services industry. Whether you require equipment rental, wet or dry hire, maintenance support, or full-scale contract mining, we have the capability to deliver tailored solutions that meet your specific needs.

OUR PURPOSE

Our core purpose is collaborating with our clients to drive project profitability and maximise return on investment.

OUR STORY

Founded in 2000 as Sweeney's Mechanical Services, SMS provided maintenance, refurbishment, sales, and service support for heavy-duty earthmoving. In 2007, rental hire services were introduced, and the company rebranded to SMS Rental, later evolving into SMS Innovative Mining Solutions. In 2016, the contract mining division was formed to deliver an end-to-end service offering. To reflect this, we evolved to SMS Mining Services.

**SETTING THE BENCHMARK
IN RELIABILITY AND
SERVICE FOR 25 YEARS.**

COMPANY PROFILE

VISION

Our vision is to be the leading mining services company recognised for adding value to projects across Australia.

We will provide safe, innovative and quality value-adding services and equipment. Our core purpose is to work with our clients to deliver project profitability and maximise the return on investment by adapting our systems to suit the specific requirements of each client and mining operation.

VALUES

We have a culture built on the foundation of our values. We are progressive, responsive and agile. We work as a team with our clients to deliver project profitability.

INTEGRITY

Respect People – Be Accountable – Do What’s Right

We do what’s right, we are transparent, we take accountability for our actions, and we are trusted partners who take pride in our work.

COURAGE

Speak up – Take Action – Challenge Yourself

We have the courage to make the change, and the strength to push the boundaries to strengthen our team.

EXCELLENCE

Strive to do better – Set the Standard

We continually strive to improve and encourage our people to develop and make effective and efficient decision.

CARE

Safe Day Every Day – Care For All

SMS is committed to the safety and mental wellbeing of all workers, in providing a workplace that does not expose harm or unreasonable behaviour.

AGILITY

Adopt and Respond To Change – Flexibility & Adaptability

We adapt a culture where we constantly evolve to reinvent, rethink, reinvigorate, to make smart decisions that focus on our outcomes.

UNITED

Be Inclusive – Work Together – Support Each Other

We value diversity, inclusion and collectively working together to achieve positive outcomes.

**WESTERN AUSTRALIA’S

02

SMS Mining Services provides flexible, reliable solutions for equipment rental, maintenance, and contract mining services.

OUR APPROACH

Creating solutions that drive efficiency and seamless execution, prioritising high-quality service and safety.

OUR OFFERING

Whether it's equipment rental, wet or dry hire, maintenance support, or full-scale contract mining, our capability lies in delivering tailored solutions that meet your specific needs. With the ability to seamlessly scale our services – from a single offering to an integrated package of all our capabilities – we ensure flexibility to adapt as project demands evolve. Our team is equipped to pivot, minimising disruption and maximising efficiency to keep your operations running smoothly.

SERVICES

SERVICE VALUES

THE OUTCOME

**WESTERN AUSTRALIA'S
LEADING SUPPLIER OF
RENTAL MINING EQUIPMENT.**

OUR SERVICES

EQUIPMENT RENTAL

We have one of Australia's largest rental fleets, including dozers, loaders, excavators, graders, dump trucks, water trucks, on-highway vehicles, light vehicles and ancillary equipment.

DRY & WET HIRE

Our skilled, machine-assessed operators deliver expertise across diverse scopes of work. For dry hire, clients can choose fully maintained rentals with onsite support or manage the equipment independently, ensuring tailored solutions for every need.

RENTAL MAINTENANCE

We offer 24/7 support, workshop services, and optional permanent onsite or field service. Choose fully maintained rentals with onsite assistance or manage the equipment independently, ensuring a solution tailored to your needs.

FLEET PROCUREMENT

SMS Mining Services offers a unique procurement service. We leverage our networks and experience to source quality, low-hour, well-maintained, and reconditioned machines and parts for outright purchase.

SCALABILITY AND FLEXIBILITY

Fleet rental allows you to scale operations without heavy capital investment. Our well-maintained fleet ensures reliable equipment when needed, minimising downtime and maximising productivity.

MAINTENANCE SERVICES

Field Service Capabilities

SMS Maintenance Services provides comprehensive on site and field maintenance and repair for all mining assets. Our maintenance contracts ensure optimal performance and efficiency for your operations from major shutdown maintenance to minor repairs.

HEAVY DIESEL MECHANICS

Trusted maintenance and repair support for heavy diesel equipment, keeping your fleet operating at peak capacity with reliable solutions for harsh mining environments.

BOILERMAKERS

Expert fabrication and repair services, including structural welding and metalwork, designed to maintain strength, durability, and performance of mining equipment and assets.

AUTO ELECTRICIANS

Skilled electrical diagnostics and repairs for mining equipment, covering wiring, lighting, and advanced systems to ensure greater reliability, efficiency, and safety in operation.

SPECIALIST – DIGGERS & DRILLS

Specialist maintenance and repair support for excavators and blast hole drill rigs, ensuring production-critical fleets remain available and reliable in demanding mining conditions.

Labour Hire Capabilities

Flexible labour hire solutions delivering skilled personnel where and when your operation needs them.

SMS Maintenance Services provides experienced, site-ready personnel for short-term projects or long-term placements, supporting productivity, efficiency and safety across mining operations. Our labour hire capability includes Heavy Diesel Mechanics for fleet maintenance and repairs, Auto Electricians for diagnostics and electrical systems, Line Boring specialists for precision component restoration, and Specialist Diggers and Drills personnel to support excavators and blast hole drill rigs. Flexible roster options ensure the right skills are available to meet your site requirements.

DEDICATED TO SUPPORTING MINING PROJECTS 24/7.

**STATE-OF-THE-ART
WORKSHOP FACILITIES
TO KEEP YOU MOVING.**

OUR SERVICES

MAINTENANCE SERVICES

Workshop Service Capabilities

SMS Maintenance Services delivers comprehensive repair and rebuild solutions across all mining assets. Our tailored maintenance contracts support reliable performance and efficiency, backed by Kalgoorlie and Perth workshops specialising in engine and component rebuilds.

MACHINE REBUILDS

Comprehensive rebuilds of mining machinery, restoring equipment to peak performance and extending its operational life to meet the demands of your project.

COMPONENT REBUILDS

Specialised refurbishment of critical components, ensuring reliability and performance while minimising costs and maximising the lifespan of your equipment.

SERVICE EXCHANGE COMPONENTS

We provide ready-to-go replacement components, minimising downtime and ensuring a seamless exchange process to keep your mining operations running smoothly.

FABRICATION

Custom metal fabrication solutions tailored to your needs deliver high-quality, durable structures and repairs for mining equipment and infrastructure.

Maintenance Contracts

End-to-end fleet maintenance support, built around reliability and performance.

SMS Maintenance Services provides integrated asset management and maintenance solutions across major mining fleets, tracking the full equipment lifecycle to support reliability, compliance and cost efficiency. Backed by dedicated dome workshops, fully equipped facilities and rapid mobilisation capability, our qualified tradespeople and experienced leadership teams deliver safe, efficient maintenance that minimises downtime and keeps operations moving.

CONTRACT MINING

SMS Mining Services delivers a complete solution, combining cutting-edge equipment, experienced teams, and a focus on safety and efficiency. Committing to reliability and innovation, we ensure seamless operations and maximum productivity.

LOAD & HAUL

SMS Mining Services offer load and haul services with a modern fleet of excavators, dump trucks, and heavy equipment, all backed by onsite workshops and experienced staff.

MINE-TO-MILL

We provide comprehensive mine-to-mill solutions across all commodities, focusing on improving operational efficiency and safety.

DRILL & BLAST

Our Drill & Blast services include tailored blasting solutions, efficient fragmentation designs, and a reliable fleet, reducing costs and improving productivity.

CRUSHING & SCREENING

We provide mobile crushing and screening, offering customised solutions for ore crushing, rail ballast, and road-building materials using state-of-the-art equipment.

ENSURING PROJECTS ARE COMPLETED SAFELY AND TO A HIGH STANDARD.

ENHANCING PRODUCTIVITY TO DRIVE GREATER PROFITABILITY FOR OUR CLIENTS.

“

Genesis Minerals contracted SMS Mining in August 2016 to deliver the load and haul requirements for the Ulysses Gold project. SMS mobilised quickly and efficiently, commencing works on the site within three months. As with all open pit projects, the requirements are constantly challenging and changing.

We couldn't have asked any more of SMS. Their team worked well with the Genesis team. They got down to work and delivered what they said they would. As a result, the job was completed safely, on budget and on time.

Working with SMS allowed us to de-risk the overall project, enabling us to extract maximum value from the pit and open up opportunities. I would recommend SMS as a good partner and team to work with.

MICHAEL FOWLER
Managing Director, Genesis Minerals

“

SMS offer a unique service with their ability to leverage their experience and relationships to assist in the acquisition of appropriate equipment on behalf of the company. They are highly responsive helping us gear up with equipment when a project needs it.

As a company to work with, the team is adaptable and flexible; and when issues or challenges arise, they work hard to come up with a solution.

We have a strong relationship with the company, with the ability to talk directly with the owners when needed.

LEE STEPHENS
GM Thunderbox, Saracen

“

SMS is a company that works with you – a strength as a contractor enabling the best results to be delivered for a client.

They come back with ideas on how to reduce costs and see it as one of their key responsibilities – the delivery of value.

They are a big company with a small company feel. They are growing however have maintained the accessibility of their senior management team with quarterly reviews in place. They are open and honest in negotiations and deadlines, and professional in their approach.

ROB RYAN
General Manager, Norton Gold Fields

“

SMS managed the maintenance and repairs of Norton's Open Pit Mining fleet totaling over 30 pieces of earthmoving and mining equipment. In 2017 SMS won the MARC re-tender, and was awarded a Contract extension for a further two years. Since 2013, SMS have demonstrated their professionalism, loyalty and commitment to Norton, with an exceptional track record in safety, quality, productivity and business improvement. SMS worked tirelessly with Norton to assist in cost reduction when the gold price dropped in 2015, which allowed Norton to continue mining its operations in a competitive manner. In 2016, 2017 & 2018, SMS bid and won full turnkey Mining Services Contracts and other earthmoving equipment rental Contracts with Norton. SMS always provide high quality rental fleet at exceptional value, with strong back up support to ensure the reliability and utilisation of the fleet meets and exceeds the customer's requirements. I have no hesitation in recommending SMS as a quality and reliable service provider.

GIL BURRIDGE
Regional Contracts Manager,
Norton Gold Fields

EXCELLENCE IN OPERATION

03

Committed to delivering exceptional results through the expertise of our people, prioritising safety, sustainability, and innovation in all we do.

SUSTAINABILITY

We are committed to the sustainability of our physical environment, and it is our objective to minimise the environmental impact of our activities.

NET ZERO

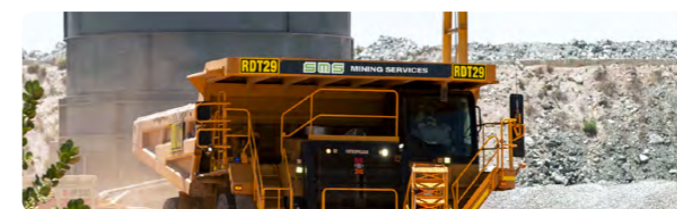

At SMS Mining Services, we recognise the mining industry is a significant emitter. That's why we're committed to reducing emissions within our operations, driving innovation to phase out reliance on fossil fuels, and supporting projects that accelerate the transition to green energy on a global scale.

ENVIRONMENT

Responsible environmental management is integral to sustaining our industry. Our values drive accountability and prudent resource use, encouraging SMART, progressive solutions while owning our results. Our environmental policy ensures all employees maintain adequate environmental controls, report hazards, and follow key objectives, including preventing pollution, promptly reporting hazardous substance releases, conducting thorough investigations of incidents, and disposing of waste responsibly through recycling or accepted practices. Together, we prioritise environmental care at every level of operation.

OUR FACILITY

Sustainability is central to how SMS Mining Services delivers infrastructure solutions. Our new facility, comprising a 9,739sqm warehouse and 900sqm site office, has been designed with innovation, efficiency, and environmental responsibility at its core. Featuring eight on-grade roller doors and generous parking, the site supports practical operations while targeting a 5 Star Green Star rating and EnviroDevelopment certification. It will operate entirely on 100% renewable energy through an integrated solar system and is complemented by native landscaping to support local biodiversity. These initiatives reflect our ongoing commitment to reducing environmental impact while maintaining operational excellence.

**WORKING TOWARDS
ZERO EMISSIONS.**

PRIORITISING PEOPLE

Our people-focused approach prioritises safety and well-being, ensuring projects are completed securely and to the highest standards.

OUR COMMITMENT

PEOPLE

SMS Mining Services employs over 400 people and is led by an experienced, hands-on leadership team. We are approachable and accountable, fostering a culture of excellence.

SAFETY

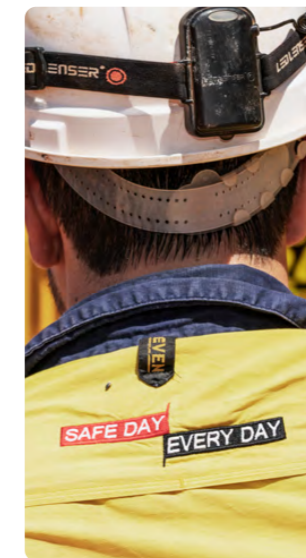

Safety is a core value at SMS and it takes unconditional priority. The principles of risk management and continuous improvement are fundamental and allow us to have a 'Safe Day. Every Day'.

COMMUNITY

We prioritise our people as the key to our success. By fostering a culture of respect, collaboration, and support, we've enhanced production and improved efficiencies while maintaining a strong safety record. Our team's dedication and expertise are central to meeting our operational goals.

LEADERSHIP

Our team comprises hands-on mining professionals who are approachable and supportive. We value open communication and constantly seek feedback to improve, ensuring a positive environment that drives performance and fosters well-being.

OUR PEOPLE LEAD THE WAY, DELIVERING SUCCESS EVERY DAY.

04

We continue to invest heavily in innovation, systems and technology to support mine operation profitability, equipment reliability and control capital investment.

CATERPILLAR 785D DUMP TRUCK

INNOVATIVE LIGHT WEIGHT TRAYS

Our new Caterpillar trucks feature an enhanced payload capacity, boosting operational productivity.

CATERPILLAR D10 DOZER

INVESTMENT IN TECHNOLOGY

The New D10 dozer is equipped with advanced antenna technology, making it Cat Terrain and remote control ready.

CATERPILLAR 992 WHEEL LOADER

ADVANCED MATERIAL HANDLER

Our 992 Wheel Loaders feature larger bucket capacity enhances productivity and operational efficiency.

OUR FLEET

DUMP TRUCKS 100T +

Our fleet of Dump Trucks range from 100+ tonne payload perfect for Gold, Lithium and Iron Ore mining operations.

EXCAVATORS 120T +

SMS Mining Services has a large fleet of excavators ranging from 120+ tonne operating weight perfect for Gold, Lithium and Iron Ore mining operations.

DOZERS 50T +

SMS Mining Services has a large fleet of Caterpillar dozers suitable for Gold, Lithium and Iron Ore mining operations.

LOADERS 30T +

SMS Mining Services has a large fleet of wheel loaders ranging from buckets sizes of 4m³ to 43m³ suitable for all size mining operations.

GRADERS 16' +

SMS Mining Services has a large fleet of motor graders ranging from 14M to 24M suitable for mining and civil operations.

WATER TRUCKS 46KL +

SMS Mining Services has a large fleet of on-highway and off-highway water trucks ranging from 30KL to 120KL capacities.

SUPPORT VEHICLES 20T +

SMS Mining Services has a large fleet of on-highway and off-highway mine site specific support vehicles.

DRILLS 89MM +

SMS Mining Services operates a fleet of high-performance drills for efficient blast hole drilling.

CUSTOMISED SOLUTION

SMS OPS is backed by SMS Mining Services' onsite training, it ensures seamless adoption while keeping your team connected and informed.

INNOVATION

SMS OPS

SMS OPS is a cutting-edge production management system designed to streamline data reporting and analysis for mining operations.

FLEET MANAGEMENT

SMS OPS is a lightweight, mobile, and customisable fleet management system designed to transform the way mining operations manage their vehicles. With real-time tracking of location, activity, material, and performance, SMS OPS offers unparalleled transparency and collaboration, breaking down the barriers of traditional systems.

ADVANCED ANALYTICS AND INSIGHTS

SMS OPS combines the strength of a modern data platform with a seamless portal experience, giving live analytics and reporting capabilities that provide precise, data-driven insights and decision support. SMS OPS offers comprehensive tracking and reporting across key operational areas including mining, drill and blast, maintenance, and safety, delivering a clear view of project performance allowing clients to gain unmatched transparency and control over their operations.

AMT ASSET MANAGEMENT

AMT is a comprehensive asset management system designed to optimise asset performance and lifecycle management. It provides robust tools for reporting, proactive maintenance, and work management, ensuring reduced asset lifecycle costs and improved operational efficiency. AMT enhances budget accuracy and streamlines resource planning through consolidated forecasting of components, labor, and performance metrics.

SMS OPS Smarter Mining Systems.
